

ISF350 Ex'd' Square Plate Axial Fan

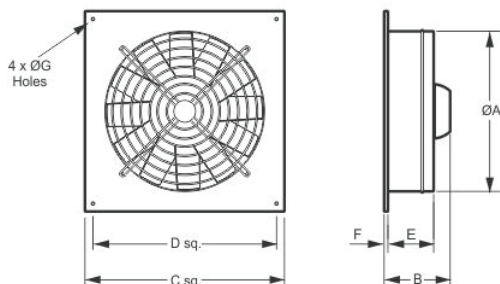

Features

Our single phase Ex'd' intrinsically safe axial wall plate fans feature a single phase flameproof motor and antistatic blades.

Typically these fans are located in battery rooms and spray booths to exhaust harmful gases, but are suitable for many more applications where explosive gases are present.

As standard, the ISF series of fans are rated to IP55, with optional upgrades to higher protection standards as required by your application.

Dimensions
